# ROOT'S NURSERIES, INC.

Manheim, R. D. No. 1, Pa.

February, 1921

Dear Friend:-

This time of year we plan for the coming season, what shall we plant, or what improvements will we make? This year it will be well to look both ways before buying, will a dollar invested now be worth more or less to us a year from now? We all agree there are many things that are never worth more than at the time we buy them. There are however some things that do increase in value from year to year, this class of stock is offered in enclosed price list. You may decide to wait until prices are lower, but can you afford to wait? Fruit trees do not come into bearing in one year. Experienced growers have agreed that Apple trees planted in orchard increase in value fully \$1.00 per year. For example, if you pay \$1.00 now for an apple tree, a year from now it will be worth \$1.00 plus the cost of the tree at that time. It is not likely that we will be giving apple or any other trees away next year, so you can figure that you will be ahead in the game even if the price seems high. If you plant in larger quantity than priced on list, send your list of wants for special prices, we make a specialty of supplying large planters.

Some Nurserymen spend lots of money telling people what wonderful trees and plants they have, there is none as good as their's. We find it more satisfactory to let our customers boost our stock, and are taking this opportunity to thank our many customers and friends for their valuable support they have given us along this line. Frequently we get letters from parties stating, you have been recommended to us by certain persons as growers of reliable nursery stock.

Will be pleased to hear from you regarding your wants, be it one tree, shrub, or one thousand. If you desire, we will help you with your planting plans free of charge.

We are improving our service wherever we can, have recently secured private telephone line, which is giving much better satisfaction than the former service.

Yours for success,
